ARCHITECT'S NOTE

In this north-facing plot, the key design philosophy was widely spacing the 2 segments of the building to allow for greater flow of natural light & air for residents' comfort. The main garden placed in the north allows for a visual setback, enhancing the look of the corner placement of the plot. The 2 main segments have been further broken down into smaller units to minimize the carbon footprint. Luxury elements like more greenery have been incorporated into Allegra to ensure residents' get the most out of their bti home.

—— Arch. Abul Kalam Azad (Kafy)

BUILDING **ENTRANCE**

- Regal double height entrance.
- The front elevation of the building will have a stylish combination of groove, glass and paint (as per design).
- CCTV monitoring system for 24/7 surveillance of the building with cameras covering all entrance points, all lift lobbies and periphery of the building as per developer's discretion.

1ST FLOOR

- Community hall for mingling and occasions
- Green area for activities & relaxation

OPTIONAL

All optional work or additional fittings and fixtures (according to customers' choice) may be done at an additional cost after approval of bti. Kitchen cabinets and built-in wardrobes may be ordered separately at an additional cost. Interior design consultation set up through bti is also available at an extra cost.

GENERATOR

A diesel-run emergency auto start/stop canopied generator, imported from Europe, to be used in case of power failure with:

1. Engine-Perkins/Cummins or good quality as per developer's choice.
2. Alternator-Stamford/Mecc-Alte or good quality as per developer's choice.

The generator will support the following:

1. Lift, water pump, and lighting in common space and stairs.
2. One light and one fan point in every room (including the staff bed), one light point in the kitchen, and all bathrooms.
3. One point for the refrigerator and one point for television.

WATER

- Underground water reservoir with lifting pump to store two days' consumption capacity.
- An overhead water tank above the rooftop with the capacity to serve half a day's requirement.
- One standby water pump for emergencies.

STRUCTURAL & GENERAL ENGINEERING FEATURES

- Structurally strong building design based on ACI/BNBC/ASTM to withstand 210 km/hr winds and earthquake resistance as per BNBC.
- Machine-made concrete Hollow blocks/ RCC Panels (damp treated & salinity proof) as per developer's choice to be used.
- All structural materials including steel, cement, bricks, Sylhet sand, and other aggregates will be screened for quality, including laboratory testing.
- Systematic testing in quality control laboratories of concrete and other completed work samples, at every stage.

PEACE OF MIND

- Proper fire protection provided by ensuring fire safety measures like; fire hydrant, fire alarm & extinguisher and fire escape for emergency exit with fire protected door on all floors.
- Earthquake-resistant design assures structural integrity.
- 24/7 CCTV surveillance and intercom service for security.
- The usage of hollow blocks / Reinforced Concrete Panels in the construction enables the reduction of sound and heat, and makes the structure lightweight.
- The best after-sales service in the real estate sector.
