

Greenville Homes

BLOCK-K, BASHUNDHARA R/A

Architect's note:

The north-facing plot in Greenville Homes opened up an opportunity to explore a vintage design theme. The key focus was on designing the schematic to help create visual setback from the road in front. Alternation between large & small apartments and horizontal & vertical plates create visual intrigue by giving the structure a hanging effect. This also opens up area for a green terrace at the ground level. Through this spacious courtyard, we were able to allow residents to enjoy greenery, natural sunlight & free flow of air at all times of the year.
